Book "Metadata" Project

Look at the cover and first pages of your book to try to fill in the information. Like a librarian, you can catalog and describe the book so other people know what it is about, if they might want to read it, and how to find it.

Title (what is the name of the book?)

Author (who wrote the book?)

Illustrator (who drew the pictures?)

Date (when was it made?)

Subject (what is it about?)

Location (where does the book take place?)

Description (why is it a good book?)
